

GRAYSON JOSEPH COX

Software Developer / Full-Stack Engineer

Bowling Green, KY | GitHub | graysoncodes.org

SUMMARY

Detail-oriented Software Developer with experience building and deploying full-stack business applications, custom CRM systems, responsive interfaces, and database-backed platforms. Experienced translating client requirements into working software, debugging production issues, and managing deployments across cloud and self-hosted environments. Strong foundation in JavaScript, Python, React, Node.js, PHP, SQL, PostgreSQL, Supabase, Docker, Linux, and Git.

WORK EXPERIENCE

2024 – Present **Software Developer / Full-Stack Engineer**
Independent & Client Projects | Bowling Green, KY

- Engineered complete business applications for client companies, guiding projects from initial requirements and UI design through database architecture, authentication, deployment, and ongoing enhancements.
- Built multiple custom CRM systems with customer management, user authentication, file handling, database integration, dashboards, and responsive interfaces.
- Developed full-stack applications using React, JavaScript, Node.js, PHP, Python, HTML/CSS, SQL, PostgreSQL, and Supabase.
- Collaborated directly with clients to translate business workflows and feedback into functional software solutions, managing feature planning, testing, debugging, and iterative development.
- Managed application deployment and maintenance using Render, Supabase, Cloudflare, Linux, Docker, and self-hosted Raspberry Pi infrastructure.

2024 – Present **IT Technician / Software & Systems Support**
Dispo Tech | Bowling Green, KY

- Repaired, configured, and prepared 200+ computers and other technology devices for business use and resale.
- Established and maintained internal software and inventory workflows to support daily business operations.
- Diagnosed and resolved hardware, operating system, networking, storage, memory, and software issues while documenting device information and repair status.

EDUCATION

2026 – Present **Computer & Information Technology (CIT)**
Southcentral Kentucky Community and Technical College (SKYCTC) | Bowling Green, KY
High School Diploma
South Warren High School | Bowling Green, KY

- GPA: 3.9 unweighted / 4.1 weighted

TECHNICAL SKILLS

- JavaScript - Java - HTML - Vite - REST APIs - Authentication - GitHub - Ubuntu - Raspberry Pi - Database Design - Client Requirements - Bug Fixing - Communication - Reinforcement Learning - Distributed Codebases - Remote Teams	- Python - C - CSS - Responsive UI Development - PostgreSQL - File Storage - Docker - Cloudflare - Full-Stack Development - Debugging - Code Refactoring - Performance Optimization - Attention to Detail - Environment Design - Code Reviews	- PHP - SQL - React - Node.js - Supabase - Git - Linux - Render - CRM Development - Deployment - Feature Implementation - Performance Tuning - Problem Solving - Large-Scale Codebases - Software Engineering Best Practices
